

OVERVIEW OF THE COMPANY

Nasatka is a security product development, engineering and manufacturing company that specializes in the creation and installment of protective barricade systems. Based in the Washington, D.C. area, Nasatka is committed to research and development of K-rated crash-test certified mobile, bollard and wedge barriers. Responding to the global need for integrated security solutions, Nasatka has expanded its specialty to providing CCTV, Video Surveillance, Intrusion Detection, and Passive Barriers.

In 2018, Nasatka merged with Apex, Fabrication & Design, to become one of the only global full-service perimeter security companies that manufactures all of its products in the U.S. Apex was an industry leader in the design and manufacture of active and passive vehicle barriers used to protect valuable infrastructure and assets.

HISTORY OF THE COMPANY

Established in 1975, Nasatka is the originator of the first, crash-tested barrier systems that were developed, manufactured, and installed in the United States. Nasatka continually challenges itself in product innovation to provide the very best and highest degree of safety and security for government agencies, military installations, top security offices, law enforcement, and commercial industries both domestically and worldwide. Long before 9/11 and the establishment of the Department of Homeland Security, Nasatka had been a global leader in the innovation, manufacturing, installation and maintenance services of vehicular access control and perimeter security system solutions. Nasatka's business also grew quickly after 9/11.

INDUSTRIES

- **Government** – Nasatka offers intuitive security solutions for Federal, State, and local governments to provide optimum safety. Nasatka provides security solutions in and around embassies, borders, military bases, and other crucial structures.
- **Commercial** – Nasatka believes that security is of large concern for everyone. IT Infrastructure is top priority for companies with large campuses, universities, or large transportation facilities like airports or seaports, etc. Nasatka has the tools and technology to keep your business or facility safe.
- **Defense** – Nasatka makes our troops' jobs much easier by providing integrated tested technology, proven to secure the perimeter of military installations.
- **Energy** – Security technologies are essential for the protection of critical energy structures such as pipelines, refineries, generation plants, and transmission lines. Nasatka products can protect these precious resources. Nasatka also has custom capabilities, to add onto previous security systems, making upgrades cost effective.

SERVICES

As “Barrier Originators,” Nasatka and its Alliance Partners provide a comprehensive, turnkey perimeter security solution and complete ongoing support for clients.

- **Maintenance** – Nasatka’s factory-trained and certified Global Alliance Partner Network provides regional expert service, planned maintenance, troubleshooting, quality parts, and complete systems support.
- **Installation and Support** – Nasatka is second to none in barrier installation. Support services are available with personnel possessing many years of experience in barrier design, manufacturing, and installation
- **Vulnerability Assessment** – In most cases, Nasatka offers free initial site evaluation for the planning and implementation of vehicle-access perimeter security measures. Nasatka assists its clients at every step, from early development through completion and into the next phase of security project planning and upgrades.

FEATURED PRODUCTS

- **K4/K8 Mobile Barriers** – Versatile and mobile, these barriers can be deployed and operational in 12 minutes, allowing teams to easily adjust entry and exit plans as needed.
- **K4/K8/K12 Crash Beams** – Drop arm barriers, which are ideal for access-control with low to medium vehicle traffic.
- **K-Related Bollards** – Secure perimeter access without providing a sense of social disorder and active alarm measures to bring environmental and aesthetic enhancements to any site.
- **K12 Steel Plate/Wedge Barriers** – Nasatka's first Steel-Plate Barrier developed and installed for the FBI's Edgar Hoover Building in 1975.
